A beautifully illustrated guide to the colors of nature

This luminous collection of striking illustrations and accompanying rhyming text teaches children how to locate and appreciate the remarkable variety of colors in the natural world. Each spread provides stunning examples of colorful abundance in nature, highlighting a wide variety of plants and animals. Richly detailed and cleverly written, this work will be a pleasure for adults and children alike.

Reviews:

A wonderful, appealing visual treat By [Midwest Book Review](#)

How does nature provide us with examples of all the colors of the rainbow in plants and animal life? Janeen Mason's gorgeous, brilliant art drawings pairs with Koski's rollicking rhymes to create the perfect rhythm and color exploration, packing each color page with examples of reds, yellows, blues, blacks and more, all from nature. A wonderful, appealing visual treat makes *Color, Color, Where Are You* recommended far and above any competing beginner's surveys of color in nature.

Great Book! By [Kelly Longstreth on Amazon.com](#) Highly recommended! My children and I loved this book so much, we bought several copies to keep on hand for birthday presents and holiday gifts! The use of vibrant colors, and the illustrations really draw you into the book!
